

DOUBLE MAJOR

A double major results in one baccalaureate degree with two majors. Students completing a double major are subject to the standard residency requirements for the degree level and are not required to complete additional residency hours beyond those required for the single degree. CSU courses taken to meet residency and institutional requirements of one major may be counted toward the residency and institutional requirements for the second major. Double majors must be completed in the same semester. One diploma will be issued for the degree.

Examples of a double majors

- Bachelor of Science with separate majors in Biology and Chemistry.
- Bachelor of Business Administration with majors in Accounting and Management
